

web receipting

ALL credit card processing programs charge fees - With TouchBase for InTouch Receipting, pay less and get more. TouchBase is fully integrated **real-time** with InTouch Receipting at the site!

TouchBase

InTouch Receipting Fully Integrated **Standard** Web package - More than just “view fees and fines” online.....PAY online! Save labor, maintain audit controls, reduce cash handling, reduce NSF check fees and provide convenience to parents .

- InTouch Receipting**
- TouchBase - w/credit card plus transaction & fine history on-line ✓**
- InTouch Athletics Module**
- InTouch Student Store Module**
- General Ledger Interfaces**
- Library Interface (Follett)**

Business Managers/District Accounting

1. Our fees can't be beat - only .35 cents per transaction. Processing fees additional.
2. InTouch Receipting has credit card fully integrated - Receipts show up in InTouch immediately - TouchBase is another site, so no duplicate entry required.
3. Monies are deposited to your bank account in three business days. No cash handling required, easy bank reconciliation as automatically deposited. We never touch district money - relationship is between you and Verisign, the leading credit card processor.
4. With InTouch Receipting integration, you get much more than credit card online.
 - a. Parents can check athletic eligibility on-line with InTouch Athletics and Activities Module
 - b. Pay for day care, food service deposits, parks & rec, pool, anything you wish to post to the website.
 - c. Lower support costs - only one software to maintain on the centralized database
 - d. No re-keying of information - control your audit trail with integrated receipts online (sites are updated realtime - parent forgot to pay? No problem, instantly updates site information)
 - e. Take advantage of the InTouch Receipting's built-in reporting; see which receipts came in credit card (and every other place of the district - an inherent advantage of your centralized database)
 - f. Better audit controls - no re-keying of data. This is a huge advantage. An InTouch receipt is issued each transaction.
5. All financial responsibility for collecting/fraud/reporting/storing data is handled by Verisign - the industry leader in security, complete encryption and trusted security! All credit card transactions can be part of your general ledger interface module.
6. As always, one SQL centralized database is more cost effective, (one backup, one place to update), easier to maintain, and provides better audit control, now even better with web credit card processing and receipting built in.

Bookkeepers/Site Managers

1. Parents are happy with the convenience of credit cards and ability to view and pay
3. Fund allocation automatic based on items being purchased
4. Reduce bad checks and bad check charges - system can pay for itself right away.
5. Automated accounting - fully integrated with your current system, General Ledger upload available.
6. Parents can pay fines on-line. Districts using Intouch fines have reported up to 40% more fines revenue collection with the convenient, accurate, easy to use fines module, and 20% more books returned. Now even easier with Follett Library Interface.
7. Integrates with the other modules like the Athletics Module - print forms from home, check eligibility from home, shows what's missing, etc. Great time saver.
