

Increase your revenue, save staff time and resources, and keep your auditors happy with enhanced internal audit controls; all the while providing online payment options today's parents have come to expect.

InTouch Receipting® is the enterprise level, centralized Microsoft SQL Server cash receipting database for the K-12 market. This easy-to-learn, comprehensive cash receipting suite shares information in real time. Data is never re-entered once the transaction is executed; all related modules immediately have the information.

InTouch itself is fully integrated...
...from the [TouchBase](#) online payments (with credit card) to the [bookkeeping terminal](#), from [district finance](#) to the [athletic director](#) and [activities and community services coordinators](#).

InTouch also seamlessly integrates with systems you use...your [general ledger](#), [student information](#), and even your [library](#) systems.

Parents and students can request comprehensive financial activity ledgers and be provided reports in a timely manner, either self-serving online or in person at the building point-of-sale cashier.

Parent relationships are highly valued in InTouch Receipting, and your staff saves hundreds of hours by eliminating duplication of efforts.

InTouch makes your job easier!

Increase revenue – fees and fines follow the students as they move up and throughout the district

- Districts have reported a 40% increase in fine revenue collected in year one!
- 20% increase in books returned
- Student Store and Athletics modules make it easy for parents and the community to support your fundraising and other initiatives

Save staff time – no more duplicate entry!

- 100% Microsoft tools keep InTouch an easy-to-learn, powerful business and cash management tool
- Integrates with your current general ledger and student information systems
- Proven integration with library and lunch systems
- Athletic module provides quick and immediate access for coaches to view athletic eligibility for any student
- Offer summer school or other programs to students and community with online sign-up, payment and forms availability
- Use for all-day kindergarten or before/after school care programs to streamline accounting

Enhance internal controls – obtain accurate, real-time and centralized tracking of fund and cash reports

Improve audit controls – auditors love our CPA-developed, accurate and efficient system

- Sequential receipts and easy exporting to Excel provide access to the data you need
- District-wide NSF tracking is centralized, real-time and integrated with receipting
- Automatically move site receipts to general ledger with several certified fiscal interfaces

Keep parents happy – parents enjoy access to information when and where they want it

- One stop shopping makes it easier for them (with less hassle for you!)
- Quickly view and pay outstanding fees and fines online
- Accept credit card, cash, check or other forms of payment (gift certificates, vouchers, etc.)
- Same system makes it easy to pay online or at any number of locations you prefer (district office, building, etc.)
- Easy parent/guardian access to payment history for each student
