TOUCHBASE INTEGRATED WEBSITE

The Scottsdale Story

We installed InTouch + TouchBase (web) in Scottsdale SD, AZ. Arizona allows a state income tax credits for eligible school district program contributions. Scottsdale SD actively participates in this program and this was their first year using In-Touch.

Because of Arizona budget restrictions, all SUSD staff were off since 12/21 and return in January. We tested TouchBase 12/29 for them and \$134,000 in seven days was brought into the school district with NO (District) employee involvement. All of this data is properly routed to the General Ledger and will automatically update the G/L to the specific department budget code.

We do not have this tax program in Washington, but the story I try to tell is if InTouch is installed you can receive revenue without any labor and provide great customer service (could you imagine this amount of money being mailed in and processed?)

WE GUARANTEE USERS WILL BE ECSTATIC WITH YOUR CHOICE!

TOUCHBASE

web payments and parent portal

***InTouch Receipting Fully Integrated Standard Web package—
More than just “view fees and fines” online... PAY online!
Save labor, maintain audit controls, reduce cash handling,
reduce NSF check fees and provide convenience to parents.***

BUSINESS MANAGERS/DISTRICT ACCOUNTING

1. Our fees can't be beat—only .40 cents per transaction. Processing fees additional.
2. InTouch Receipting has credit card fully integrated—Receipts show up in InTouch immediately—TouchBase is another site, so no duplicate entry required.
3. Monies are deposited to your bank account in three business days. No cash handling required, easy bank reconciliation as funds are automatically deposited. We never touch district money—relationship is between you and the credit card processor.
4. With InTouch Receipting integration, you get much more than credit card online.
 - a. Parents can check athletic eligibility online with InTouch Athletics and Activities Module
 - b. Pay for day care, food service deposits, parks & rec, pool, anything you wish to post to the website.
 - c. Lower support costs—only one software to maintain on the centralized database
 - d. No re-keying of information—control your audit trail with integrated receipts online (sites are updated realtime—parent forgot to pay? No problem, instantly updates site information)

Sample Student Shop - easy for managers to maintain.

Re-print a Receipt On-Line-save time consuming calls from parents and students stopping by the office

View and pay fines online. Fines follow the student in detail year after year, for as long as the student is in the district. Fines may come from the Follett Library System.

Easily view and print student's transaction history, both for online and at the school. Fully integrated receipts.

- e. Take advantage of InTouch Receipting's built-in reporting; see which receipts came in credit card (and every other place of the district—an inherent advantage of your centralized database)
- f. Better audit controls—no re-keying of data. This is a huge advantage. An InTouch receipt is issued each transaction.
- 5. All financial responsibility for collecting/fraud/reporting/storing data is handled by Verisign—the industry leader in security, complete encryption and trusted security! All credit card transactions can be part of your general ledger interface module.
- 6. One SQL centralized database is more cost effective, (one backup, one place to update), easier to maintain, and provides better audit control, now even better with web credit card processing and receipting built in.

BOOKKEEPERS/SITE MANAGERS

1. Parents are happy with the convenience of credit cards and ability to view and pay
2. Fund allocation automatic based on items being purchased
3. Reduce bad checks and bad check charges—system can pay for itself right away.
4. Automated accounting—fully integrated with your current system, General Ledger upload available.
5. Parents can pay fines on-line. Districts using Intouch fines have reported up to 40% more fines revenue collection with the convenient, accurate, easy to use fines module, and 20% more books returned. Now even easier with Destiny Library Interface.
6. Integrates with the other modules like the Athletics Module—print forms from home, check eligibility from home, shows what's missing, etc. Great time saver.
